

# LIXAS TATU

TRADIÇÃO EM ABRASIVOS

## FICHA TÉCNICA DE PRODUTO

### APLICAÇÕES:

Lixa indicada para uso em superfícies metálicas em geral, remoção de ferrugens, desbaste e acabamento de massa poliéster, massa acrílica, preparação e nivelamento de superfície úmida ou molhada. Com picote central otimizador.

### COMPOSIÇÃO / DADOS TÉCNICOS:

- **Abrasivo:** Óxido de Alumínio Marrom.
- **Costado:** Spunbonded.
- **Adesivo:** Resina sobre Resina.
- **Camada:** Aberta.
- **Grãos disponíveis:**

P36 P40 P50 P60 P80 P100 P120 P150 P180 P220

- **Formas de conversão:** Folhas nas dimensões 225mm x 275mm.

- **Embalagem:** 25 folhas.

- **Rolos:** 50mm a 225mm x 45.000mm.

NOVIDADE

# LIXAS TATU

TRADIÇÃO EM ABRASIVOS

## W291 BLACK INFINITY

A lixa Black Infinity possui costado resistente a água que garante desempenho superior frente as lixas convencionais.

Com alta capacidade de remoção e resistência mecânica, é muito eficiente para o lixamento de superfícies metálicas em geral, remoção de ferrugens, desbaste e acabamento de massas plásticas e acrílicas, preparação e nivelamento de vários tipos de superfícies. Por ser flexível, adapta-se facilmente a peças curvas.

The Black Infinity sandpaper has a sturdy and waterproof side that ensures its superior performance compared to conventional sandpapers.

It has high removal capacity and mechanical resistance. It is very efficient for sanding metallic surfaces in general, conventional sandpapers.

It has high removal capacity and mechanical resistance. It is very efficient for sanding metallic surfaces in general, conventional sandpapers.

It has high removal capacity and mechanical resistance. It is very efficient for sanding metallic surfaces in general, conventional sandpapers.

# W291 BLACK INFINITY

## PROPRIEDADES:

- Costado Spunbonded, flexível com boa resistência ao rasgamento.
- Excelente rendimento nas operações de desbaste.
- Fabricada de acordo com a norma FEPA.
- Alto rendimento e acabamento mais uniforme.

- A folha de lixa Black Infinity possui um picote no sentido linear para facilitar a utilização, caso necessário utilizar pedaços menores, corte fora do picote, utilize um objeto cortante, tesoura ou estilete.
- Utilize sempre água limpa na lubrificação.
- Não deixe as lixas acumuladas no balde antes ou após serem utilizadas, esta ação pode danificá-las, reduzindo seu tempo de uso, causar a contaminação de grãos e provocar riscos na superfície.
- Utilize sempre uma sequência de grãos adequada para se obter o acabamento desejado. Como regra geral, para melhor relação entre acabamento e desempenho da lixa, recomenda-se excluir somente um grão na sequência a ser utilizada, ou seja, caso esteja utilizando um grão de lixa P80, deve-se pular o P100 e usar na sequência o P120.

## INSTRUÇÕES DE USO

CARACTERÍSTICAS	BENEFÍCIOS
<b>COSTADO SPUNBONDED</b>	<ul style="list-style-type: none"><li>• Alta flexibilidade</li><li>• Resistência</li></ul>
<b>NORMA FEPA</b>	<ul style="list-style-type: none"><li>• Padrão internacional</li><li>• Melhor uniformidade no lixamento</li></ul>
<b>BOA ADESÃO E ANCORAGEM DO ABRASIVO</b>	<ul style="list-style-type: none"><li>• Durabilidade</li><li>• Alto rendimento</li></ul>

## ARMAZENAMENTO

O produto deve ser estocado em sua embalagem original, à uma temperatura entre 15 °C e 27 °C e umidade relativa entre 35 a 50% e afastados de pisos, janelas e locais úmidos.

Nas condições acima a validade do produto será de 5 anos.
